

# SEALANTS

## Mirror Gloss Sealant

Locks in the shine. Proven paintwork protection for up to 12 months. Unique, patented Nanomeric polymer resin formula bonds to paintwork, creating a totally smooth surface to repel dirt, water & sunlight. The revolutionary clear formula seals the surface to prevent fading or oxidising & protects against surface damage and scratches.

- Leaves no white residue.
- Seals in a long lasting, lustrous showroom shine.
- Simply wipe on to seal in.

## Interior Fabric Sealant

Protects interior upholstery, carpets seats and fabric trim from stains and liquids. Easy to apply, unique fabric sealant offers ultimate protection against spills, dirt and grime. Once applied, each individual fibre is coated, creating an invisible barrier that repels dirt and most liquids. Spills cannot penetrate the surface and will simply roll away, keeping your car interior looking brand new.

- Use on interior upholstery, carpets, seats, and fabric upholstery.
- Dried on dirt and grime can simply be vacuumed away.

## Soft Top Sealant

Specially formulated to revive colour instantly, improving the appearance of the hood. Quick and easy to apply, Soft Top Protector will reproof, protect and preserve the cabriolet hood. Applying the protector will extend the life of the hood whilst keeping it looking clean and fresh.

- Suitable for all fabric hood colours.

## Trim & Tyre Sealant

Bumpers, trim and tyres stay cleaner for longer. The special formula bonds to the surface creating a shield that repels dirt, keeping trim cleaner for longer. Advanced tyre, bumper and trim protection leaves a long lasting lustrous finish on all tyres and trim. Adheres to all plastic surfaces, providing protection against dirt, dust and grime.

## Instant Wheel Sealant

A self cleaning formulation that shields the wheel, repelling brake dust, dirt and grime. Unique formula bonds to the wheel surface creating a protective barrier from brake dust, dirt and grime. Once applied, Instant Wheel Seal acts as a shield to maintain the clean appearance of wheels.

- Easy on formula – simply spray on and allow to dry.
- Apply to instantly shield your wheels from dirt & grime.

# ASK ...the TECH GUYS

**Q** I have been using your Auto Finish Advanced Resin Polish but it has hazed and dried before I have buffed it off and has left white patches on the paintwork, how can I remove this?

**A** Re-apply a small amount of polish to the affected areas and buff off whilst still wet, this should remove the dry polish. Continue polishing as normal ensuring polish is buffed off before it has dried. Make sure you work on small areas at a time to avoid the polish from drying.

**Q** My leather seats are really soiled with drinks and chocolate, will soapy water be ok?

**A** No, using soapy water on leather upholstery will, in time, dry out the leather and cause it to crack. Use a specialist leather upholstery cleaner, such as Auto Finish Leather Cleaner & Conditioner. Using Auto Finish Leather Cleaner & Conditioner will clean all surface dirt and help nourish and condition the leather, keeping it soft and supple.

**Q** Can Auto Finish Mirror Gloss Sealant be used instead of a polish?

**A** Auto Finish Mirror Gloss Sealant is formulated for use after paintwork has been polished. Applying Mirror Gloss Sealant after polishing seals in the shine and protects paintwork for up to 12 months.
